SAFE X

Your AI-Powered Cybersecurity Assistant Integrated with SAFE One

CISOs have invested tens of millions in building their cyber defense infrastructure, yet they still lack critical business impact insights to fully protect the organizations they serve. Instead, they are weighed down by manual reports and outdated dashboards that provide only snapshots or incomplete views of their cybersecurity posture, often missing the broader business context.

And, the most critical questions remain unanswered:

- *What are my top risks?*
- *What are my riskiest vendors?*
- *What are my most effective controls?*
- *What is the risk associated with emerging threats?*
- *How do we compare to our peers? … and anything else in cybersecurity!*

SAFE X changes the game by equipping CISOs with the data and insights they need to make proactive decisions that drive the greatest business impact. Powered by advanced AI, SAFE X delivers instant answers on an organization's cyber risk posture and offers personalized recommendations for mitigating risk.

Why SAFE X?

💡 **Powered by AI and SAFE One**
SAFE X leverages advanced AI and SAFE One's extensive integration network to analyze complex cyber risk factors,

💡 **Trusted Insights**
Built on open standards such as FAIR and MITRE ATT&CK, SAFE X delivers defensible and transparent results that CISOs can rely on.

💡 **Tailored for CISOs**
Available in both SaaS and mobile app, SAFE X offers a simple, user-friendly experience that delivers critical insights and real-time recommendations.

💡 **Actionable Recommendations**
SAFE X doesn't just offer insights; it provides recommendations to reduce cyber risk effectively.

SAFE X is not a standalone mobile app—it is fully integrated with the SAFE One platform. This means SAFE X doesn't just deliver surface-level insights; it taps into a rich pool of data aggregated from over 100 sources to provide a 360-degree view of your cyber risk posture.

Built on trusted standards like FAIR and MITRE ATT&CK, SAFE X delivers transparent and defensible results that CISOs can rely on for critical decision-making.

SAFE X: Actionable, Intelligent, Simple

- **Real-Time Cyber Risk Insights**

  SAFE X delivers a 360-degree view of your organization's cyber risk posture in real time. CISOs can instantly get answers to critical questions about risks, vulnerabilities, and controls.

- **AI-Powered Decision Support**

  SAFE X recommends personalized risk mitigation strategies, leveraging AI to analyze your organization's cyber risk data. This helps prioritize the most effective actions for reducing risk based on current threats.

- **Seamless Integration with SAFE One**

  By combining SAFE One's currently capabilities SAFE X easily integrates with your existing cybersecurity tools, pulling in data and insights without requiring manual input.

- **Proactive Risk Mitigation**

  Stay ahead of threats with AI that continuously monitors your environment, identifies emerging risks, and suggests preventive actions tailored to your organization's specific needs.

- **User Experience Tailored to CISOs**

  SAFE X is designed specifically for cybersecurity executives, offering insights in both technical and business-friendly language. This makes it easier to communicate risk to the board and align cybersecurity strategies with business goals.
