

The Autonomous Cyber Risk Management Platform

Built with 25+ specialized AI agents to continuously quantify and reduce cyber risk—across Third-party, Enterprise, and AI ecosystems.

SAFE reinvents cyber risk management with Agentic AI. It helps CISOs, TPRM, and GRC leaders become strategic business partners by automating the understanding, prioritization and management of cyber risk—accelerating AI adoption and digital transformation. SAFE unifies the management of all cyber risks—enterprise, third-party, and AI-related—and delivers autonomous cyber risk management through a fleet of specialized AI agents.

One Platform. Multiple Capabilities.

SAFE TPRM

100% autonomous Third-Party Risk Management via 25+ AI agents.

SAFE Enterprise CRM

Unified view of enterprise cyber risk: maps assets to financial exposure.

Agentic AI

Specialized AI agents that autonomously execute scanning, analysis, and reporting—24/7.

SAFE X

Gen-AI cybersecurity assistant for CISOs: real-time answers on top risks and investment priorities.

Cyber Insurance

Risk-quantified reports to lower premiums, accelerate underwriting, and align security with insurance.

100+ API Integrations | 3 Billion+ Cyber Signals Processed Every Day | < 1 Minute To Onboard Any Vendor

"SAFE has really brought true innovation to cyber risk management. SAFE handles the creation, outreach, follow-ups, and gets us what we need—without all the back-and-forth. We're completing assessments faster and with more insight than ever, and the best part is, it requires almost zero effort from my team. I've gained maturity and capacity without adding headcount."

Dr. Heather Dart
Sr. Manager of IRM at Danaher

"SAFE One transforms the way we approach risk management by shifting the focus from isolated vulnerabilities to comprehensive organizational risks. This contextual approach ensures that we evaluate vulnerabilities within their operational and strategic significance, rather than in isolation"

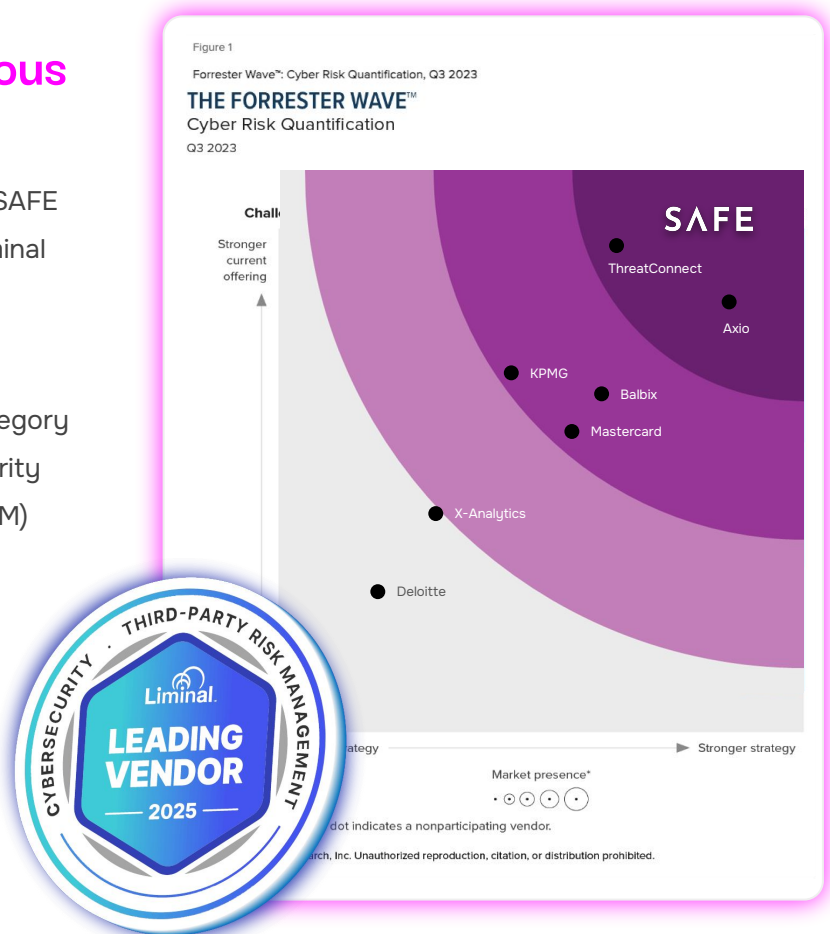

Kapil Madaan
CISO, Max Healthcare

Values that SAFE Delivers

- **100% Autonomous, All-in-One Third-Party Risk Management:** SAFE's Agentic AI delivers 100% autonomous TPRM: automating discovery, tiering, and assessments. It replaces siloed tools with one integrated platform combining ratings, questionnaires, contracts, and breach insights. Every vendor is continuously monitored, scored, and prioritized based on business risk.
- **10x Better Cyber Risk Visibility & Communication:** Understand the impact of critical findings from across your cybersecurity tools or a new threat actor's campaign, to business risk and communicate efficiently to your leadership helping them make cyber risk an informed business decision.
- **Transforms Cyber Insurance into a Strategic Advantage:** SAFE turns cyber insurance from a cost center into a competitive edge. By quantifying risk with real-time data, SAFE enables better coverage, faster underwriting, and 20–30% lower premiums. It connects your cybersecurity posture directly to insurer expectations—bringing transparency, leverage, and control into the conversation.

SAFE: Leader in Autonomous Cyber Risk Management

- **Ranked #1 in TPRM Product Capability:** SAFE is ranked the leading TPRM vendor by Liminal in their Cybersecurity Third-Party Risk Management Link Index™ Report (2025)
- **Industry Leader:** Safe Security is the Category Leader in **The Forrester Wave** Cybersecurity Risk Quantification & Management (CRQ+M)
- **Built on 100% Open Standards:** The only cyber risk platform purpose-built on open industry standards including FAIR™, NIST™-CSF, MITRE™ ATT&CK.
