

# SAFE One: Autonomous Cyber Risk Management With Agentic AI

To truly enable the business, cybersecurity risk management must move beyond legacy tools that deliver siloed visibility, generic dashboards, and redundant manual workflows that add to overload—while missing the critical context of risk. Without this, cybersecurity devolves into a compliance checkbox exercise rather than a true driver of business resilience.

SAFE delivers this transformation with Autonomous Cyber Risk Management powered by Agentic AI.

## SAFE One: The Leader in Autonomous Cyber Risk Management

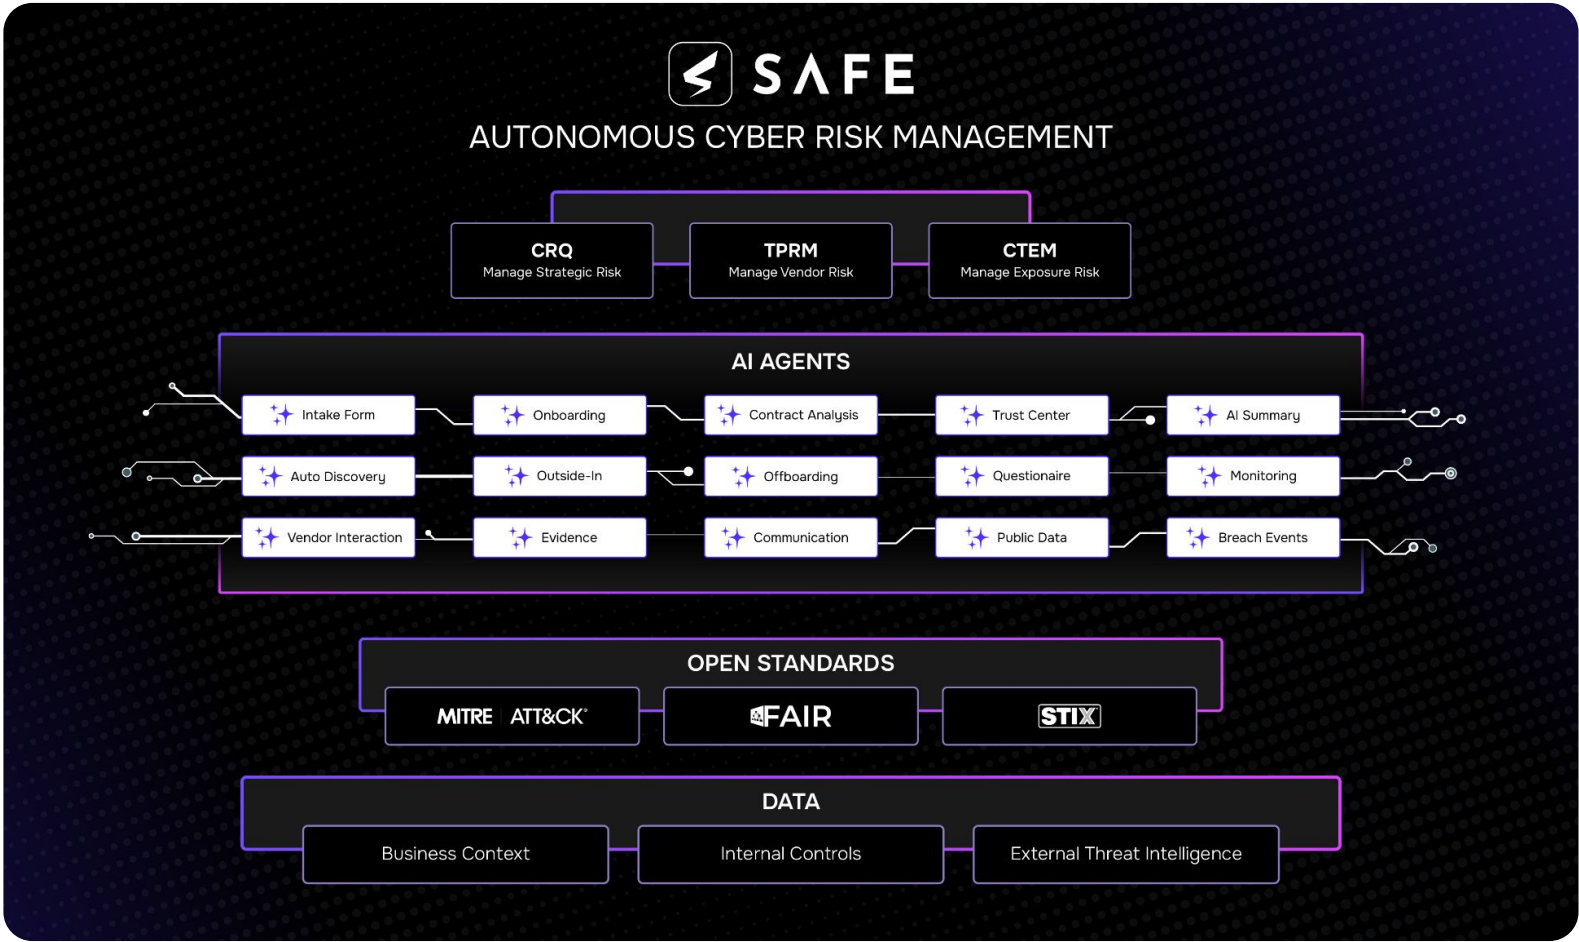

SAFE empowers CISOs, Cybersecurity, and TPRM leaders continuously and efficiently quantify, prioritize, and mitigate cyber risks across their entire attack surface – enabling digital growth and resilience. Unlike manual, point-in-time, black-box approaches, SAFE offers Agentic AI-powered, continuous, and defensible cyber risk management, based on objective telemetry and transparent, open risk standards across the entire attack surface, including third-parties.

The SAFE One includes:

- **SAFE CRQ** to manage strategic risk
- **SAFE CTEM** to manage exposure risk
- **SAFE TPRM** to manage ecosystem risk

### Why SAFE Wins?

-  **Autonomous Cyber Risk Management**  
100% autonomous cyber risk management across CRQ, CTEM, and TPRM using 100+ out-of-the-box API integrations & 25+ GenAI Agents
-  **100% Built on Open Standards of FAIR, MITRE**  
The only solution in the market to have its foundation on global standards, providing unmatched transparency and confidence
-  **Risk-Based Cyber Risk Management**  
Prioritize cyber risk across your enterprise and third parties based on loss and likelihood instead of arbitrary scores or heat maps
-  **Align Cyber Risk Management to Business Goals**  
Ensure cyber risk management strategies are tied to explicit risk appetite objectives, fostering a risk-aware culture across all the enterprise
-  **Accuracy & Credibility that Cyber Insurers Trust**  
SAFE is trusted by global brokers and underwriters enabling customers to get superior insurance coverage at discounted premiums

<a href="#">SAFE CRQ</a>	SAFE CRQ is the category leader. It empowers CISOs to know and understand cyber risk, strategically prioritize investments based on ROI, and efficiently report and communicate with the Board and Regulators.
<a href="#">SAFE CTEM</a>	SAFE CTEM is the industry's first autonomous platform that connects exposures directly to business risk. It shifts security teams from manually collecting findings to autonomously prioritizing and remediating the most critical exposures first.
<a href="#">SAFE TPRM</a>	SAFE TPRM is the only 100% autonomous TPRM platform powered by Agentic AI. It delivers a unified platform to manage the entire TPRM lifecycle, coverage at scale without adding headcount, and zero-effort vendor interactions.

SAFE: Powered by 25+ Specialized AI Agents

- Public Records
  - Contract Intelligence
  - Fourth-Party
  - Outside-In
  - Threat Intel
- Digital Footprint
  - Auto-Fill
  - Questionnaire Analyzer
  - Communication
  - ...and more

Trusted by Industry Leaders

"SAFE has really brought true innovation to cyber risk management. The best part is, it requires almost zero effort. I've gained maturity and capacity without adding headcount."

**Dr. Heather Dart**  
Sr. Manager of IRM at DanaHER
