

The Only AI-driven Platform to Manage Your First-party and Third-party Cyber Risk, Enabling Your Business to Safely Go Faster

CISOs must scale cyber risk management strategies at the pace of the business to position cybersecurity as a catalyst for business growth rather than a constraint. Legacy solutions rely on manual effort and subjective assumptions, rendering them ill-equipped to meet requirements for real-time, data-driven cyber risk management.

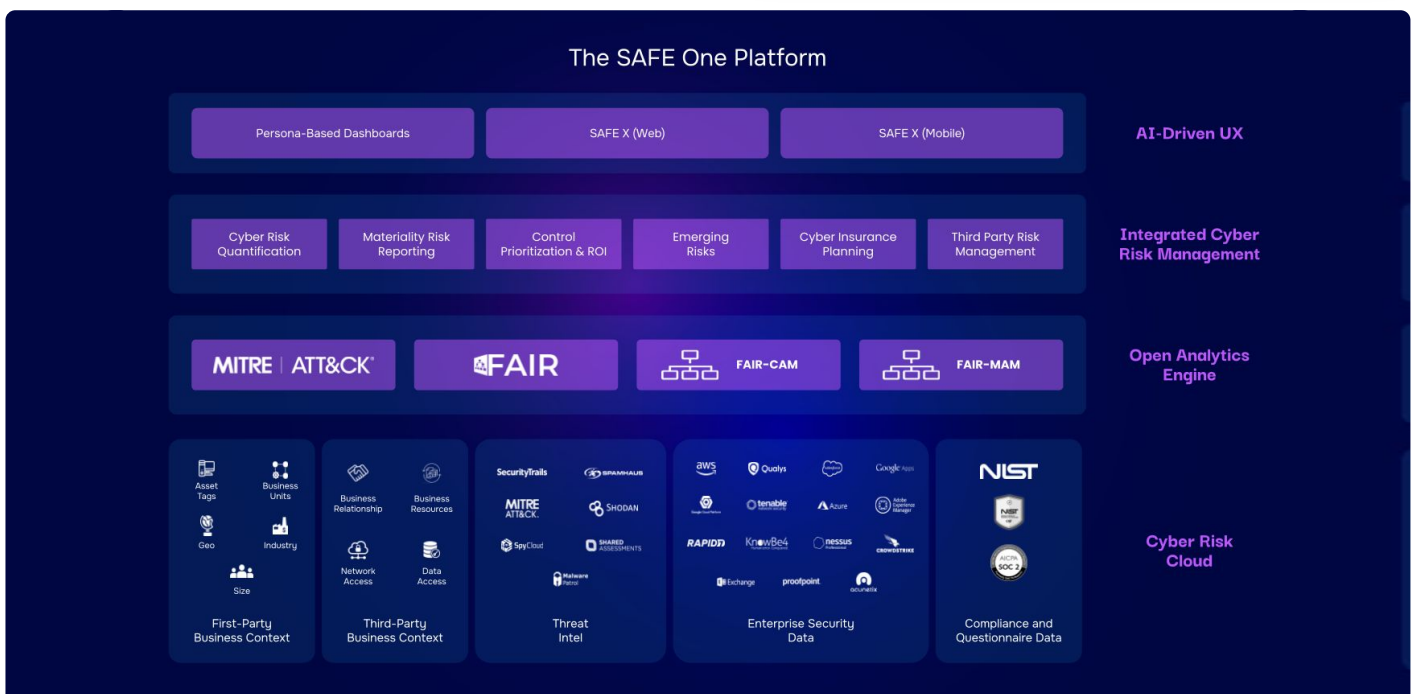

A modern solution lies in an automated, AI-powered approach that empowers CISOs to secure their seat in the Boardroom.

The SAFE One Platform

SAFE One delivers industry’s only data-driven, unified platform for managing all of your first-party and third-party cyber risks. It enables organizations to effectively measure and reduce cyber risk and track progress over time. SAFE One’s revolutionary approach empowers CISOs with real-time, trustable, and defensible data that meets regulatory requirements and board expectations of protecting shareholder value and securing the business.

Solution Highlights

- Industry’s only AI-powered, unified platform for managing first-party and third-party cyber risks
- Only solution purpose-built on open standards (FAIR™, MITRE™, NIST™) to deliver the industry’s most transparent & defensible results
- Automated risk aggregation with the tools you already use featuring OOTB 100+ integrations
- Granular view of enterprise-wide risks across Groups like Business Units and Business Apps
- Automate controls effectiveness using FAIR-CAM to get risk impact in financial terms
- Get comprehensive FAIR cyber risk scenarios to manage cyber risk in real-time
- Defensibly determine incident materiality using our built-in FAIR-MAM framework.
- Clearly articulate ROI of security controls to justify budgets effectively
- Get instant answers to the most pressing cyber risk questions with GPT-enabled chat interface

Customer Benefits

1. Get Real-time, Unified, Enterprise-wide Cyber Risk Visibility

The SAFE One generates a real-time, unified risk view across and enables you to prioritize top risks across the entire attack surface. This helps security leaders understand which risk scenario matters most to the business. SAFE also comes with out-of-box risk scenarios contextual to your business to get you up and running quickly in days.

2. Ace Cyber Risk Board Reporting

SAFE One helps CISOs to translate the bits and bytes of cyber risk into dollars and cents, enabling CISOs to tell a compelling story to relevant stakeholders. SAFE offers customizable dashboard views to showcase a cyber risk view that matters most. Users can also generate trustable and defensible reports for regulators, including the SEC, NYDFS, and more.

3. Justify Current Cybersecurity Budget And Future Investment

Safe empowers leaders to comprehend the reduction of risk resulting from previous security investments at both the scenario and control levels in clear, dollar-driven terms. This enables you to justify past cybersecurity expenditures by presenting clear metrics, such as "Our likelihood of a ransomware attack decreased from 26% to 13% over the past year, and we halved our estimated loss magnitude from \$50M to \$24M."

4. Operational Prioritization Based on Control Effectiveness

SAFE One is the first and only solution that has implemented the **FAIR-CAM** model to automate and translate controls effectiveness to risk and give you the impact in financial terms. With SAFE One, CISOs can simulate the cost and results of security spending to predict risk reduction; whether it's new solutions, tool expansion, or technology adjustments.

5. Accurately address: Is This Cyber Incident Material?

SAFE One enables organizations to accurately assess the materiality of a cyber incident. SAFE natively implements **FAIR-MAM**, an open and customizable cost model that is defensible to the Board, investors, and regulators. SAFE provides a library of OOTB reports and dashboards like SEC Materiality dashboard help accelerate SEC compliance.

6. Accelerate Risk Decisions with SAFE X's AI-Powered Insights

SAFE One revolutionizes how the CISO can use a cyber risk management platform. SAFE X, our intuitive GPT-enabled chat interface instantly answers users' most pressing cybersecurity questions – anytime, anywhere.
