

# Transform Your TPRM Game With A Risk-based TPRM Approach With SAFE!

Third-party Cyber Risk Management continues to be a major problem for CISOs as today's approach is inadequate. Organizations have relied on security rating vendors such as SecurityScorecard, Bitsight, and others which have failed to provide an effective platform for managing and lowering third-party cyber risk. These legacy solutions lack visibility into financial loss exposure and break the bank covering all your vendors.

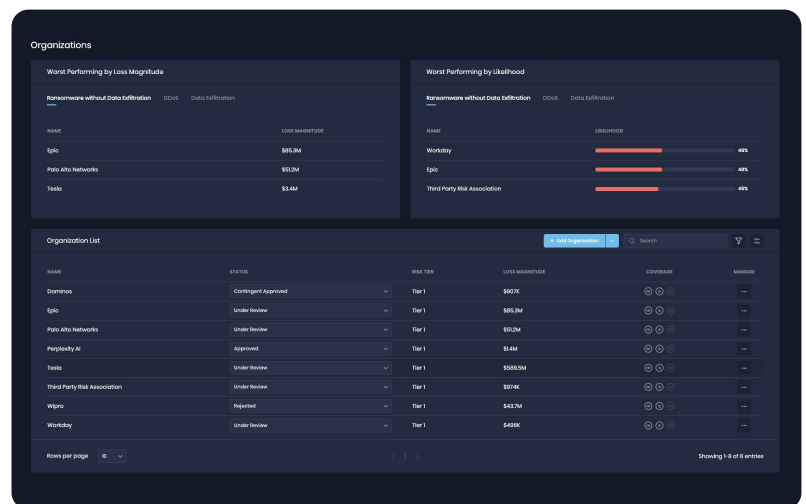

Introducing Safe **Third-Party Risk Management (TPRM)** module, the latest edition to the SAFE One platform. SAFE TPRM offers a groundbreaking solution that slashes costs while enhancing your understanding and communication of third-party risk. SAFE TPRM employs a risk-based approach that enables organizations to lower third-party risk while at the same time reducing cost.

## Why SAFE TPRM?

- **Understand & Prioritize:** Understand and prioritize third-party cyber risk from a business impact perspective
- **Gain Insight into Financial Loss Exposure:** Automatically quantify financial loss exposure for with each third party
- **Enhance Decision-Making:** Compare vendors on financial loss exposure vs. technical ratings or contract values
- **Automate & Scale Your TPRM program:** Automate TPRM to reduce time spent on data collection & processing
- **Reduce Cost:** Analyze the risk associated with all your relevant vendors at a lower, fixed price
