

Kettering Health Customer Spotlight

Prior to the introduction of the FAIR model for risk quantification, our risk management program struggled to get off the ground. The automated features of the SafeOne platform allows us to streamline our QRAs (Quantitative Risk Assessment), reducing our time to complete an analysis from days or weeks to hours.

Use Case

FIRST PARTY

Positive Business Outcomes

- **Timely Risk Assessment:** Kettering Health rapidly evaluated the risk associated with not upgrading pharmacy carts, enabling a data-driven decision before a critical deadline.
- **Enhanced Risk Visibility:** SAFE Security provided Kettering Health with a comprehensive understanding of its risk profile, supporting informed decision-making.
- **Strategic Decision Support:** The platform's insights empowered Kettering Health's CISO to make a strategic decision regarding technology upgrades and leverage discounts provided by third parties.

Before SAFE

- **Limited Visibility into Risks:** Kettering Health lacked a clear understanding of the risks associated with outdated technology, hindering effective decision-making.
- **Manual Risk Assessment Processes:** Traditional risk assessment methods were time-consuming and prone to errors.

After SAFE

- **Data-Driven Decision Making:** SAFE Security's platform enabled Kettering Health to quickly assess the risk associated with not upgrading pharmacy carts, guiding their decision-making process.
- **Streamlined Risk Management:** SAFE's intuitive interface and automation capabilities streamlined Kettering Health's risk management processes.
- **Enhanced Risk Visibility:** SAFE provided Kettering Health with a comprehensive understanding of its risk profile, supporting informed decision-making.
- **What's next: - Strategic Risk Reporting:** Kettering Health plans to leverage SAFE Security to generate risk reports for board-level consumption.
- **What's next - Budget Prioritization:** The platform will support Kettering Health in prioritizing security initiatives based on their risk impact.
- **What's next - Expanded Risk Management Initiatives:** Kettering Health may explore additional use cases for SAFE Security, such as third-party risk management or vulnerability management.

This case study demonstrates the value of strategic partnerships and innovative risk management solutions. By leveraging SAFE Security, Kettering Health has been able to make data-driven decisions, enhance its risk posture, and improve operational efficiency.
